DETAILED ACTION

Claim Objections

1. Claim 34 is objected to because of the following informalities:

The typographical error in claim 34 regarding "to publishes" has not been corrected. Appropriate correction is required.

Claim Rejections - 35 USC § 103

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 1-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wilson in view of (Zusman et al and Kampe et al).

Wilson discloses what is set forth in the previous office action.

Wilson discloses market event messages (which includes market activity data and time data) translated into a common format. Wilson does not disclose translating a portion of received messages into market event messages.

Zusman et al discloses translating a portion of messages into messages having a common format (col 6, lines 26-31).

Kampe et al discloses market event data as received messages (col 1, lines 45-48).

It would have been obvious to one with ordinary skill in the art to translate a portion of received messages into market event messages having a common format to Wilson because of what is taught by Kampe et al and Zusman et al. Kampe et al teaches that received messages having market event data must be continuously updated in a synchronous and compatible fashion (col 1, lines 20-67; col 2, lines 1-36). Zusman et al teaches accuracy and timeliness of financial data (col 2, lines 5-10) including standardization of message formats for delivery purposes (col 6, lines 25-42).

Response to Arguments

4. Applicant's arguments with respect to claims 1-37 have been considered but are moot in view of the new ground(s) of rejection.

Regarding the recitation to "translating" it is the examiner's position that translating as broadly defined as "to change from one form or style to another" does encompass what is disclosed by Zusman.
